

INTELLIGENCE. PUT TO WORK.

AI systems, websites and software.
Built around your business.

AI / WEB / SOFTWARE / SECURITY / DATA / WEB3

**A clear idea.
A considered build.
Something that works.**

aletheiaai.tech

WHAT WE BUILD.

One technology partner. A broad set of capabilities.

01 **AI Product Engineering**

LLM applications, agent systems, RAG pipelines and computer vision. From architecture to a working product.

02 **MVP & Rapid Prototyping**

Turn a promising idea into a focused product you can put in front of real users.

03 **Full-Stack Development**

Websites, web applications, APIs and real-time systems. A complete experience, from interface to infrastructure.

04 **Cybersecurity & Auditing**

Security audits, penetration testing, vulnerability assessments and secure architecture design.

05 **Blockchain & Web3**

Smart contracts, decentralised applications and token systems, connected to usable product experiences.

06 **Data Engineering & ML**

Data pipelines, model development and MLOps. The foundations for reliable intelligent applications.

WORK THAT MAKES IT REAL.

AI ASSESSMENT PLATFORM

HeuriSight

Combining document understanding and heuristic reasoning to connect student work with educational competencies.

[View case study >](#)

WEBSITE & MEMBERSHIP PLATFORM

RD Fitness

A responsive fitness platform connecting brand storytelling, membership registration and class booking.

[View case study >](#)

AI DEVELOPER TOOL

CodeCraft

A command-line coding assistant with role-based reasoning, project rules and safeguards for development workflows.

[View case study >](#)

PYTHON DATA SDK

Inscrape

A developer toolkit for structured web extraction, Markdown output and screenshots with asynchronous support.

[View case study >](#)

BUILT HERE.

Tools shaped by real engineering work.

Inscrape

Structured web data. Less friction.

A Python SDK for intelligent web extraction.

Nirvana

Bring clarity to the alert inbox.

Deduplicate, route and prioritise monitoring alerts.

SwarmScope

Explore complex systems.

Multi-agent simulations from unstructured data.

START WITH THE PROBLEM

LET'S BUILD WHAT COMES NEXT.
